NATIONAL LIBRARY OF MEDICINE CATALOG

A List of Works Represented by National Library of Medicine Cards
1956

LIBRARY OF CONGRESS

WASHINGTON 1957

INTRODUCTION

On October 1, 1956, the National Library of Medicine came into being as a result of enactment of Public Law 941, 84th Congress (The National Library of Medicine Act) At the same time, the old Armed Forces Medical Library was transferred to and absorbed by the new Library Consequently, the present volume is the first volume of the *Catalog* to be issued under the new name Data on the previous volumes of this series are available on the verso of the title page, opposite this page

This current annual volume of the NLM *Catalog* supplements the 1950–1954 quinquennial edition, and the 1955 annual volume of the AFML *Catalog* The NLM *Catalog*, together with the *Current List of Medical Literature*, serves as a continuation of the Library's bibliographical record begun in 1880 with the advent of the *Index Catalogue of the Library of the Surgeon General's Office*

The publication of the *Catalog* is a joint operation of the Card Division and the Catalog Maintenance Division of the Library of Congress and the Catalog Division of the National Library of Medicine At NLM the chief responsibility for the printed *Catalog* is borne by Miss Eleanor R Hasting, Head of the Processing Section

The Library wishes to record its gratitude to the Library of Congress for its continuous encouragement and support, and for the opportunity to participate with the Library of Congress in this published bibliographical record

EXPLANATORY NOTES

1 SCOPE

a. The *Catalog*, Part one *Authors* reproduces in book form all NLM catalog cards prepared in 1955 for materials of medical interest It includes cards for currently received materials and for titles from the old collections which were recataloged during the year regardless of date of publication.

b Part two *Subjects* is more limited in scope because of the Library s policy of assigning subject headings only to titles published within the last twenty five years (i e since 1930) Exceptions are made in the application of this terminal date in the case of 1) important reference and historical materials, 2) biographies and bibliographies 3) periodicals 4) congresses, 5) statistical documents, and 6) works about institutions, such as hospital , clinics, etc

2 POLICIES

The following information on the Library s cataloging policies and practices is included in the expectation that it will increase the usability of the data presented in the *Catalog*

a. *Cataloging Policies*

(1) The A L A *Cataloging Rules for Author and Title Entries* is accepted as the Library s code except that

(a) Each publication of a corporate body is entered under the name of the body in use at the time the publication was issued

(b) Each periodical is entered under the title in use at the time of issue

(c) Civilian hospitals are entered *under the* place in which they are located and not directly under the name of the hospital Cross references from the name of the hospital to the place name have been omitted from the printed *Catalog* in the interests of economy

(d) The explanatory phrases "Spurious and doubtful works" and "Supposed author" have been eliminated as a part of the author heading

(2) The Library of Congress *Rules for Descriptive Cataloging* govern the descriptive cataloging detail except that

(a) A number of simplifications have been adopted

(b) Certain modifications have been made in order to provide needed information on pre-1801 books and Americana titles.

(3) Standard titles are utilized in cataloging pre 1801 editions of early authors when the number of editions with varying titles makes this desirable (Example Galenus.)

(4) Multiple added entries for editors and translators of texts published before 1801 have been eliminated by adding to a single entry the information that other editions may be found under the main entry (Example Fioravanti Leonardo d 1588) Occasionally this policy may be misleading in an annual volume because the other editions referred to will not appear together until the next accumulation of the *Catalog* is published (Example the reference to Cooke James, 1614-1688 under Hippocrates.)

PART ONE

Authors

b *Classification Policies*

(1) Medical titles are classified by the National Library of Medicine *Classification* (second edition, 1956)

(2) The Library of Congress classification schedules are used freely for titles in medico social, medicoeconomic, and other borderline fields However, the class numbers are not used in as much detail as in the Library of Congress, and often only representative numbers have been selected from the full schedules for NLM use

c *Subject Heading Policies*

(1) The subject headings used are based on the list developed for the subject card catalog They differ somewhat from those used in other libraries These differences are often due to simplifications, e g, INJURIES, instead of WOUNDS AND INJURIES, ABSTRACTS, instead of ABSTRACTS, RESUMES, ETC

(2) Generally speaking, geographic subdivisions consist of the name of the country, or the name of the state or province if American or Canadian

Further subdivision by city or county is made only where justified by the number of titles under that particular subject

(3) Uniform subject heading punctuation, consisting of a dash is used even in the case of inverted adjectival headings, such as MEDICINE—MILITARY and PATHOLOGY—SURGICAL

ARRANGEMENT

a Part one *Authors*

(1) Entries included in Part one *Authors* are arranged in alphabetical order with the following exceptions

(a) An author title added entry follows the same author title as a main entry

(b) An author added entry follows all author title entries under that name

(c) When standard titles are used the entries under the author s name are divided into two groups 1) pre 1801 publications (with standard titles) and 2) editions published after 1800 (without standard titles) Where necessary explanatory cards and date guides are inserted to clarify the arrangement of entries

b Part two *Subjects*

(1) Subjects and subject subdivisions are arranged in a straight alphabetical sequence

(2) No attempt has been made in this volume to combine subjects with subdivisions under the general subject as was done in earlier volumes in order to avoid subdivisions with single entries

from the British Museum.
The physiognomical portion (leaves
A[2]-B[4]) is apparently an epitome by an
unknown hand, of books 1 3 of the author's
Chyromantie ac physionomie anastasis.
Its prologue is made up of portions from
the prologue and the beginning of book 1 of
the Anastasis. The Compendium is
illustrated with 28 woodcut figures of heads.
The chiromantic portion (leaves C[1] to
end) is headed: Andreas Corvi Mirandulani
Absolutissima rerum chiromantiae. It con-
sists of 21 p. of text, a woodcut diagram of
the hand with the areas named in German,
and 150 smaller woodcut figures of the
hand, each with explanatory text below it.
Also issued in German by the same
printer in the same year
